

BOSCH WIPER BLADES

INFORMATION ON SCANIA APPLICATIONS: NEW GENERATION TRUCKS

Scania introduced in 2020-2021 a new facelift of G, L, P, R and S models.

SÉRIE L

SÉRIE P

SÉRIE G

SÉRIE R

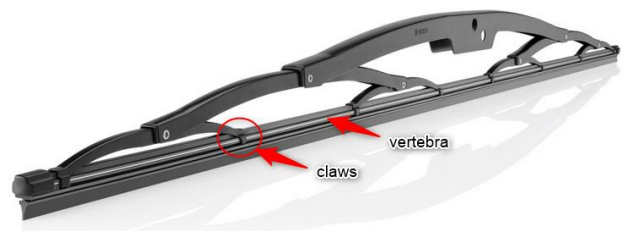

SÉRIE S

This came along with slight changes of the wiper system: Scania created a brand **new shape of the 12x4 U-hook arm**; dimensions of **claws** also changed, former **vertebra design** was also reshaped.

Top : new arm

Bottom : former arm

Bosch therefore needs to adapt its Twin Truck wiper range: a new shaped 700mm wiper is currently under development, with a premounted hook adapter and spray nozzle on the center bracket.

The New part number will be available beginning of 2022.

Regarding vehicles with manufacturing date until 2020, we offer a solution either with a spray nozzle on the arm (N76), or with a spray nozzle on the wiper (N71).

Scania Applications | G, L, P, R, S Series
