

MERITOR® GENUINE MDP5000 BRAKE PADS

Worldwide braking leader for the commercial vehicle industry supplying friction products as Original Equipment and into the aftermarket. Meritor is committed to bringing you the best in braking solutions.

- Genuine OE Quality
- Quality Components
- Wide Product Range
- OE Genuine applications
- OE Genuine Wear & Braking Performance

- OE Quality:** Homologate brake pads for Meritor brakes.
- Applications:** Meritor brakes for Heavy Duty, Long Haul, Bus & Coach. Max temperatures up to 500°C.
- Back Plate:** OE retention system.

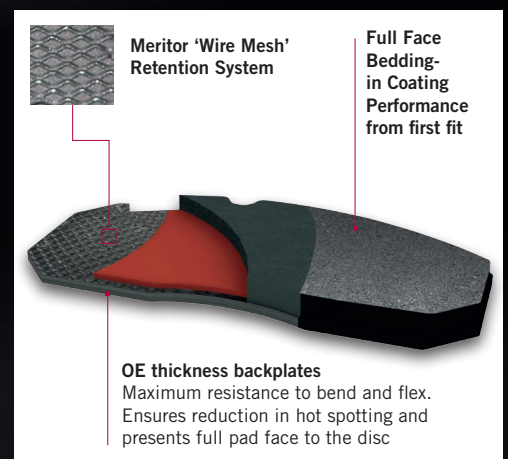

QUALITY COMPONENTS

Meritor pads feature a mesh back plate interface for maximum friction block security and protection of caliper seals.

Optimised for:

- Meritor OE pads friction material are design for a specific Meritor brake system/ Vehicle and model, which deliver the best performance in terms of braking, wear, service and product life in a vehicle. level and stability across temperature range above 500°C
- Included original equipment accessories such as retainer springs, retainer plate, bolts and pad wear warning indicators (If the vehicle requires).
- Meritor recommend to use original Meritor parts in the vehicle (Bus/Truck/Trailer) in order to deliver an optimal brake performance/ functionality of the calipers, brake pads, brake disc and components increasing the life of the products and reduce the replacement rate.

MERITOR® GENUINE MDP5000 BRAKE PADS

WIDE PRODUCT RANGE

Different friction materials homologate for the vehicle manufactures to meet different customer expectations for Truck, Bus & Trailer.

Meritor exclusivity OE homologate friction materials for specific vehicle applications:

- City buses and coaches (Vmax 100 km/h): **FER 4567 / FER 4568**
- Heavy duty trucks and tractor units: **FER 4572**
- Trailers (ROR): **FER 4562**

OE GENUINE WEAR & BRAKING PERFORMANCE

OE Pads and OE rotors developed together. Test results based on matched friction couple.

- MDP5000 Genuine brake pads are MERITOR approved and manufactured in conformity with OE specifications and EEC Reg 13 braking standards used by the Original equipment manufacturer.
- OE Meritor Brake pads and Brake Rotors are designed in order to deliver the best brake performance working together.
